

Rugged • Accurate • Easy to use

# AUTOMATIC BRAKE TESTERS...

## The Inspection Lane Standard!

Easily installed surface or flush tread plates minimize the positioning problems experienced with roller systems.

- World's most widely accepted and used brake tester
- Braking imbalance shown at a glance.
- Instantaneous testing
- Tests large or small vehicles
- No complicated electronics or hydraulics
- Rugged, trouble-free construction, performance-proven in thousands of inspection lanes

Simple, fast reading...liquid level in tubes show braking ability of each wheel with a fifth tube for total braking effort...detect low, unequal or unsafe braking conditions at a glance.

WY-75-36	3'0"	15'6"	5'10"	12'11"	34'8"

\*Other Braking Effort Capacities in pounds per Vehicle Wheel

†Longer wheelbase vehicles may require extended tread plates.

## ADDITIONAL WEAVER EQUIPMENT

# PVMI Approved

- Flush mounted for fast, automatic operation
- Wide tread plates for full tire pattern contact with any over-the-highway vehicle
- Drive on from either direction
- Eye level scale makes reading easy, fast and accurate

Width, overall	12'5"
Length, overall	4'3-5/8"
Ht. of pedestal	4'10"
Tread plate length	4'0"
Tread plate width	3'0"
Tread plate C. to C.	5'10"

Fast wheel alignment tester

## There's a **WEAVER**® jack for any job LO-HI-DRAULIC Service Jacks...

A full range of sizes and capacities to handle any service job, from tire-changing on compact cars to track removal on the heaviest tractor.

- Low silhouette for easy positioning
- Unique quick-lift lever for fast approach of saddle to load on 2, 4, 10 and 20 ton models
- Counterbalanced handle
- Three position handle lock for easy maneuvering
- Capacities from 2 to 20 tons

Weaver Jack Oil  
with rust inhibitor,  
for all hydraulic jacks.
